

Gold Standard Oils Co. Welder Killed In Explosion

INQUEST NOT NECESSARY;
DEATH ACCIDENTAL

Word was received in town on Wednesday night last of the death of Mr. Murray Wallace, welding expert of the Gold Standard Oils Ltd., which took place at Provost, caused by the explosion of a big gasoline tank upon which he was working.

It appears that in company with a helper, Mr. Wallace had journeyed from Wainwright to repair a leak in the big double container at Provost, and preparatory to doing the work they had "steamed out" the tank, which was mounted on a high stand, for some considerable time before the welding, but after only a few moments from commencing work, Mr. Wallace, who was standing on a ladder, was literally blown to the ground by the force of the explosion, striking his head severely on a concrete sidewalk with the result that he sustained a severe fracture of the skull which caused his almost immediate death.

Dr. York, who is coroner for that district, was immediately called and ordered removal of the patient to the hospital, but he passed away without regaining consciousness.

It is assumed by the police, who have been investigating the case, that the heat from the welding torch ignited some fumes which still remained within the tank, thus causing the accident, and Chief Coroner Braithwaite having been given the particulars it was considered an inquest was not necessary.

The deceased leaves a young wife; but there are no children.

The body was brought back to Wainwright, where it was prepared by the McLeod Undertaking parlors for shipment to Waterford, Ohio, birthplace of deceased, to which it was shipped on Friday's train.

A brother of the deceased, who came up from Montana on Friday and Mrs. Wallace left for there on Saturday morning.

Condolences are extended to the relatives and friends of the deceased and especially to the fellow employees of the Gold Standard refinery, among whom the deceased was highly rated and well liked.

Schools Open; Big Registration

Ding-dong! Ding-dong! And thus the familiar peep of the school bell on Tuesday morning called the students of all ages entering the studies in the several schools in town and district, with a registration quite as large (or a little greater) than for the previous year.

Some will be just beginning their career as pupils, in the primary department others will be entering upon the wider field of high school and still others who attended school last term will be there for information before departing, for the last time from the school house in which they received their education as a young man or woman.

The older students will not return—some of them will enter upon a vacation chosen in the last few weeks, while others will prepare themselves for further service in the field of education.

Through it all rings the directing of the teachers whose toil is sometimes unknown. It is to be hoped that as the Wainwright school pupils and students enter upon this term they will endeavor, as will the teachers, to co-operate with one another in the work which they plan to do so that at the end of school attendance they may be able to say that they played a part in building up the harmony of the school.

To the older students who are now entering upon a career unknown to them we say do not forget that knowledge does not end at high school, nor normal, nor university in all its degrees. Sometimes common sense can only be gained by experience—sometimes by the teachings of others whom we meet in the walk of life—and always in watching in our own lives what we do and say. In all phases of our life we learn, and with our learning should teach others. "Farewell to thee" we say with the best of luck and success to those students who, this year will leave for other points to continue their studies.

Remember it's not so much THAT we live but HOW we live in relation to others.

LINE ELEVATORS REDUCE
GRAIN STORAGE RATES

Line country elevator and terminal companies have now filed tariffs with the Board of Grain Commissioners providing for a reduction in storage rates from one thirtieth to one forty-fifth of one cent per bushel per day. This reduced rate became effective September 1st, 1935.

Absolute Free Hand Given W. Aberhart

CALGARY.—A caucus of 63 Social Credit candidates and members last week endorsed William Aberhart, leader of the Alberta party and made it possible for him to step into the premier's office at once. The party swept the province elections but Aberhart was not a candidate. Coupled with the endorsement motion was a blanket order to Aberhart, giving him a free hand in the selection of his cabinet and offering him any seat he selected. Sponsored by J. W. Huggill, Calgary and Rev. William Morrison, High River, Okotoks.

Part of a resolution passed unanimously by the caucus, read: "William Aberhart as leader and premier-elect shall have an absolute free hand in the selection of such persons as he deems necessary for the duties involved in the efficient administration of provincial affairs."

Important Changes Made in Game Act

Important changes in the game regulations of the province, which include reduction of game fees in many instances, have been announced. One of the most important will permit residents of Manitoba, Saskatchewan or British Columbia to hunt bird game in Alberta for a fee of \$2, provided they are holders of game bird licenses in their own provinces. This is a reduction from \$10.

There is no longer any special license necessary for bear in the forest reserves, this being altered in the general big game license, and license fees have been reduced. Resident elk game fee is now \$200; resident elk license is now \$500.

There will be an entire closed season on swans, cranes, pheasants, grouse, and spruce partridge. There will be a ten-day open season for prairie chicken from October 1 to 10 in the territory lying south of the North Saskatchewan River, and west of the Calgary-Edmonton line and the Calgary-Macleod line of the C.P.R. and west of the line between ranges 25 and 26 to the international border.

Open season for Hungarian partridge south of the main line of the C.P.R. across the province will be from September 16 to November 30 and in the territory north of the main line of the C.P.R. from October 1st to November 30. There is no change with respect to the duck season.

The use of rifles in killing waterfowl is prohibited. The migratory birds convention act carries this prohibition, and is now included in the Alberta game act.

Ask Ottawa to Help if Needed

CALGARY.—If the inquiry into the financial condition of the province, which will be undertaken by the new Social Credit government, reveals that unexpected financial aid is required, application will be made to the federal government at once for assistance, Premier Aberhart stated in an interview on Saturday.

Mr. Aberhart said that he would be prepared to go to Ottawa to interview the federal government.

The fall semester opens at variety on Monday, Sept. 23rd.

Edgerton Bank Gets New Mgr.

F. W. Davis, formerly of Thorby Alberta, has been appointed manager of the Bank of Montreal's office at Edgerton, succeeding H. C. Chaplin, who has been transferred to Claiborne, Alberta.

Mr. Davis was born at Dawson, in the Yukon Territory, and received his education at Upper Canada College, Toronto. He entered the banking profession in this province in 1920, joining the staff of the former Merchants Bank of Canada at Medicine Hat. Two years later this institution was taken over by the Bank of Montreal, and Mr. Davis continued his career with the latter bank. In 1929 he was appointed manager at Thorby, Alberta, which position he has held until his present appointment to Edgerton.

Mr. Davis has been active in baseball and tennis clubs where he has been situated and Mrs. Davis is well known in Edgerton musical circles, having been singing for the Canadian Radio Commission.

Mr. Jack Taylor is completing the stuccoing of quite a number of houses in the district north of Irma.

Miss Bessie Bowerman leaves for her teaching appointment at Auburndale school this week-end.

Mrs. T. Lissimore and her daughters spent the holiday with relatives at Lindbrook, Alta.

Mr. and Mrs. Fred Aykroyd are now in residence in the Frank Stevens house on Sixth avenue west.

Burglars Effect Night Entrance to Men's Furnishing Store on Main Street

Some time during the very early hours of Monday morning last, the store of Mr. W. S. Clark, on Main street, was the rendezvous of marauding visitors, and a large quantity of clothing, etc., was stolen from the premises.

From information to hand, it would appear that the burglary was effected by the deliberate forcing of a back storm door, and this was followed by the removal of a screen panel in the large back doors of the premises which were then unbolled and entry made.

The large stock of men's wearing, boots, shirts, ties, etc., seems to have been most thoroughly gone over, and quantities of each of the better qualities in each case were removed. The goods which are now known to be missing include oxford shoes, fine socks, a whole stand of fine ties, a complete suit of clothes, several pairs of men's pants, silk shirts, etc.

It is learned that Mr. Telford first gave the alarm to Mr. Clark from the fact that the first named noticed the back door of the Clark store standing open at an early hour on Monday morning, and knowing Monday to be a holiday and the store supposedly closed for the day.

Mr. Clark immediately got in touch with the R.C.M.P. in town and they at once got busy on the case with the result that quite a quantity of goods were discovered to have been dropped by the burglars in several places in the lanes to the east of the store. Apparently the thieves had overloaded themselves with loot and thus lightened their burden.

Notification of the affair was at once wired up and down the C.N. line east and west in an effort to get trace of the guilty parties and search parties combed the area around town for several hours, but the presumption remains that advantage had been taken of one of the several freight trains which pass through the town during the night hours.

At this writing no arrests have been made, although there seems to be a probability that a couple of strangers who were seen hanging about among the merchants on Saturday afternoon may be implicated, and these are being traced by the police.

The Clark store seems to have been the only place which was visited by the burglars.

LOCAL NOTES

Mr. Hiram Dowling is now the owner of a dandy new Chevrolet.

Mr. W. O'Callaghan and family have now returned from Cornwall, Ont., where they have been enjoying a holiday with relatives.

Mr. F. E. McLeod was away for several days last week in attendance at the annual convention of the Alberta Embalmers Association held this year in Edmonton.

Practically all of the big registration of youngsters was on hand on Tuesday morning when school reopened, and quite a number of beginners made their debut.

Mrs. H. Lepper, who has been here on a visit to her father, Mr. W. H. Kemp, has returned to her home in Edmonton.

We are glad to know that Mr. Frank Lush, who was rushed to the hospital with appendicitis last week is now much improved.

Don't forget the date of the big Masquerade Dance at King's Park—September 8th. Snappy music and good prizes ensure you of an evening of fun.

Mr. and Mrs. Dave Davison of the park staff left on Monday for a motor trip to Banff and other pleasure centers for a couple of weeks; Miss V. Billings accompanied them.

Sir Malcolm Campbell, in his reconstructed "Bluebird" racer which weighs some 16 tons, made an average speed of over 299 miles per hour on a measured mile and return at Salt Lake, Utah, U.S., on Monday.

Mr. and Mrs. G. Morley spent a couple of days here from the city for the holiday.

W. I. Hold Big Annual Conference

Wainwright constituency conference of the Alberta Women's Institutes was held in the Masonic Hall on Thursday last, with an attendance of fifty-three.

Mrs. B. Ford, district convener, presided with Mrs. J. W. Stuart as secretary. Mrs. W. A. Brown, provincial director, was in the presence. Reports were given by the following branches: Irma, Rose Wilton, Wainwright, and work on standing committees was reported on by—education and better schools, Mrs. Eric McLean; league of nations, Mrs. R. Ott; Canadianization, Mrs. W. Chynoweth; Canadian industries, Mrs. J. W. Stuart; agriculture, Mrs. W. Stewart.

Others taking part in the program were: Miss Martin, a reading "Economy in the home"; Mesdames Sprad and Graham, piano duet; Mrs. W. R. Ott, Canadianization; and "Rule of Isabel McFarland". Mrs. W. A. Brown addressed the conference on the subject "Background", dealing with the background of the immigration to our country, describing their homes, dress, customs and music.

Elections of officers for the coming two years resulted as follows: District convener, Mrs. McFarland, Irma; household economics, Mrs. Larson, Irma; child welfare and public health, Mrs. Martin, Wainwright; legislation, Mrs. Wilton, Irma; Canadian industries and agriculture, Mrs. B. Ford, Heath; handicraft, Mrs. Greer, Wainwright; league of nations, Mrs. R. H. Ott, Greenhills; Canadianization and immigration, Mrs. Wright, Irma.

The close of the conference the ladies of the Wainwright Institute served the supper, which was greatly enjoyed by all.

All the branches are doing a splendid work in helping the needy, sick, and the bereaved in our community.

Aberhart Premier Alta. S. C. Gov't.

CALGARY GETS FOUR CABINET MINISTERS

NEW LEGISLATURE SWORN IN

On Tuesday the new provincial legislature, under the premiership of Mr. Wm. Aberhart, of Calgary, leader of the Social Credit Party, was sworn in at Edmonton by Lieutenant-Governor L. Walsby, and are now in power.

The new cabinet, which consists of eight members who expect to draft the first Social Credit legislation in the world, were named by Premier Aberhart on Friday last as follows:

President of the Council, and Minister of Education—Mr. Wm. Aberhart, Calgary.

Attorney General—Mr. J. W. Huggill, K.C., Calgary.

Provincial Secretary—Mr. E. C. Manning, Calgary.

Provincial Treasurer and Minister of Municipal Affairs—Mr. C. Cockcroft, Gadsby.

Minister of Agriculture, and Minister of Trade and Industry—Mr. W. N. Chant, Camrose.

Minister of Public Works and Minister of Railways and Telephones—Mr. W. A. Fallow, Vermilion.

Minister of Lands and Mines—Mr. C. C. Ross, Calgary.

Minister of Public Health—Dr. W. W. Cross, Hanna.

At the time that the new cabinet was named, the premier stated that as soon as his party had taken over the duties of the government, an investigation into the finances of Alberta will be commenced, to settle disquieting rumors regarding the liquid position of the provincial treasury.

Premier Aberhart and Mr. C. C. Ross, neither of whom were candidates at the recent elections, will be found seats; possibly in southern constituency.

WAINWRIGHT WIN BOTH GAMES IN TWIN BILL

PAUL SPORNITZ IN GOOD FORM
TOUCHED FOR THREE HITS—
GETS 18 STRIKE-OUTS

WAINWRIGHT 5-KITSICOTY 2

In the double-header played here on Sunday afternoon last, Wainwright won both games, scores reading 5-2 and 9-2.

Paul Spornitz performed on the mound for the local boys and allowed only three scattered hits along with striking out thirteen men.

The first three innings went scoreless but Kitscoty took a one-run lead in the fourth inning. A. Lampitt scoring after getting to first through an error at the short stop position.

Their lead was short-lived however, as Wainwright collected no less than four runs in the fifth frame. Ed Ganderton, who pulled his ball out of the mouth-bait and put in a smart performance around first base started the locals on their way by slamming out a nice two-base hit and was followed by Doug Wallace getting a single.

Ed getting put out at third on the play, Sam Roberts, due to an error by the short stop, made first and Paul Spornitz followed him with a single, filling the bases. Ches Spornitz then drove one down past the pitter and the second baseman, scoring Doug Wallace, Russell Ganderton brought in two more runs with a two-base hit, Roberts and Spornitz coming in. Ches Spornitz scored on P. Stuart's single.

They added one more run to their total in the seventh. Ches Spornitz scoring. He reached first by an error.

The fourth inning saw Reg. Coffield get his big hit of the day for three bases and came home due to an error at second base.

Kitscoty came within one of evening the count in the fifth inning. B. Lampitt got a single and advanced to third on two passed balls at the plate and scored on an over-throw at third. C. Mitchell, who also scored was awarded a free pass to first on balls and scored on Caldwell's hits.

Wainwright went on a hitting spree in the seventh inning which resulted in them scoring six runs. Mitchell, the Kitscoty chucker, was hit for nine smacks in this inning, two of them being doubles.

The game was called in the seventh inning. Geo. Clark handled the game.

Rust Causes Loss of \$100,000,000

OTTAWA.—Farmers of western Canada will lose approximately \$100,000,000 on account of rust this year, taking 80c a bushel as the average price for wheat, Dr. E. S. Archibald, director of experimental farms, believes.

Dr. Archibald told a local service club he had made two trips to the wheat this season and until three weeks ago looked for a 500,000,000 bushel crop of wheat, oats and barley. Now, however, the situation is changed.

Western grain fields had been struck by the worst epidemic of black stem rust ever experienced in Canada. Previous epidemics had come in 1904, 1910, 1920, 1923 and 1927.

Rust caused a loss of 100,000,000 bushels in 1916, and Dr. Archibald said that was "The year of the great disaster in western Canada, when wheat was so badly needed by Great Britain and the allies." It had meant a loss of \$150,000,000.

This year the loss would be greater, although the financial loss will be smaller on price account, and United States farmers have suffered also to the tune of many millions.

"The condition this year," he said "is that at the present time according to estimates made about ten days ago there will be a total reduction in the west of about 102,000,000 bushels."

Added to the loss in volume would be a reduction in the grades of wheat which would almost equal the monetary loss involved in the decreased yield.

Canada Wheat is in Key Position

CHICAGO.—Canada, traditional competitor of United States wheat growers, held a key position in the world wheat situation Saturday and uncertainty as to governmental intentions for the ultimate disposition of the dominion's surplus has again become an important factor in the world grain trade.

Whether the time for which Canadian wheat was waited when the world will be at their door asking for wheat—is at hand, grain traders are not prepared to say.

Anxiety as to the new Canadian wheat board's policy was a restricting influence on trade.

Mr. L. L. Howes, a former old-timer of the district, was a business tripper to town at the first part of the week.

error by the short stop and came in when the left fielder failed to catch a fly ball that came his way.

Kitscoty tried to rally in the eighth inning but were only rewarded with one run. L. Lampitt, the first man up, singled and scored on Art Lampitt's single.

The visiting team are not likely to break any baseball records but do boast of having five brothers all playing on the team, which is quite a record in itself.

WAINWRIGHT 9-KITSICOTY 2

Changing pitchers, the same two teams tangled again, which resulted in Wainwright winning by a more decisive score than in the first game.

Sam Roberts took over the pitching duties for the locals and managed to be a bit too tough for the visitors. In the seven innings played he struck out twelve men and allowed six hits that were as scattered that they did very little damage. Charlie Mitchell pitched for Kitscoty and was hit very freely, being touched for thirteen hits, two of these being good for three bases and two for two bases.

Phil Stuart started the scoring when he poked out a three-base hit, bringing in Russell Ganderton, who had reached first base due to an error at third base. Phil also came in when Russell Coffield hit one down to the second baseman which resulted in an error.

The fourth inning saw Reg. Coffield get his big hit of the day for three bases and came home due to an error at second base.

Kitscoty came within one of evening the count in the fifth inning. B. Lampitt got a single and advanced to third on two passed balls at the plate and scored on an over-throw at third. C. Mitchell, who also scored was awarded a free pass to first on balls and scored on Caldwell's hits.

Wainwright went on a hitting spree in the seventh inning which resulted in them scoring six runs. Mitchell, the Kitscoty chucker, was hit for nine smacks in this inning, two of them being doubles.

The game was called in the seventh inning. Geo. Clark handled the game.

Canadian Medical Association

GRANT FLEMING, M.D. — ASSOCIATE SECRETARY

NUTRITION

An interesting and instructive development in medicine has been the direction of attention towards the patient as an individual, rather than to focus attention on a diseased part or on a disease.

We know that if a person is to be healthy, he must have health in all parts of his body. Health implies the harmonious and efficient working of all parts of the body and mind.

The old idea that you ate fish as food for your brain and iron for your nerves is discarded. We have learned that the whole body must be properly fed if any one part is to be adequately nourished. Furthermore, no one article of food goes to make brains or nerves.

When something goes wrong within the body, even though the ill effects may seem to be limited to one part, it is the whole body which is disordered or diseased. You cannot have diseased lungs and have a healthy body other than the lungs. The body is a living functioning unit, not a collection of unrelated parts.

When treatment has to be considered, no longer is it a question of what is the right treatment for a diseased stomach, but rather what is the best treatment for a man whose stomach is diseased.

These may seem to be the same thing, but it is not so. Some years ago typhoid fever cases were starved because it was feared that food might injure the ulcerated bowel. This may have been good treatment for the bowel but it was definitely hard on the patient. Now that typhoid fever patients are being better fed, more satisfactory results have been obtained, because the general need of the patient, rather than one part of his body, have received consideration.

A number of faddy diets have come into existence because of their supposed value in some particular condition. Nearly all of these are faulty because they fail to provide for the general well-being of the persons concerned.

This does not mean that proper care and attention are not to be given to the treatment of disorders of function and to disease. All that is implied is that, together with such treatment, there should go an equal amount of care and attention to all the physical and mental parts which make up the individual requiring attention.

JASPER HAS THE FINNIES!

JASPER. Kamloops trout that will run to five pounds in weight are abundant in Amethyst Lake in Tonquin Valley, Jasper National Park. Kamloops trout, a species taken from the lakes in Kamloops, B.C. district, were planted in the Amethyst waters following the success of the Maligne Lake planting of speckled trout, and sport fishing for them has recently been opened. The first parties visiting the lake succeeded in landing plenty of two-pounders while larger fish were seen in the clear cold waters.

CELLOPHANE WRAPPED?

Many things today are cellophane wrapped. However, an exception was doubtless made the other day when police raided a nudist camp on the Island of Loban in the Danube. The nudists dove into the water followed by the police who captured them and "after wrapping them up" took them to the "boose-gow."

VERY LATEST

Designed in Sizes: 8, 10, 12, 14 and 16 years. Size 10 requires 2 1/2 yards of 35 inch material with 2 1/2 yards of ribbon for sash and 1/2 yard of a narrow ribbon for bow.

GIRLS' SUMMER FROCK

Pattern 8496 The Junior miss likes frocks which resemble those which her older sister wears and big sister is now going in for sashes and shirring in a big way.

So we have designed this gay and charming frock for the young girl to wear on summer afternoons. The sleeves introduce the popular shirred accents. They are full, short and puffy below the rows of shirring. Shirring by the way, is a very simple, but very effective bit of hand sewing. The neckline is slightly gathered into the small bow and the pointed yoke is attached to the gathered part of the waist.

For Pattern, send 15 cents in coin (for each pattern desired your NAME, ADDRESS, STYLE NUMBER and SIZE to Patricia Dow, (Wainwright Star) Pattern Dept., 115 Fifth Avenue, Brooklyn, N.Y.

A man who is glad to learn is usually profitable to listen to.

For the 12 months ended June, 1935, Canada exported \$33,614,238 worth of agricultural products to the United States.

Experimental Farms News

STAKE GOOD POTATO PLANTS FOR SEED

Potato tubers do not cross. They reproduce true to type. The only way to obtain a potato cross is through the seed balls, which sometimes form on the vines, and this method of propagation is practically never resorted to unless by someone interested in originating a new variety. Tubers are not really seed, although commonly so-called, but are a vegetable part of the plant. If, therefore, the tubers are not mixed during the operations of digging, handling, storage and planting, the variety will not become impure (unless by the rare chance of a sport) no matter how closely to another kind it may be grown. Thus, one may confidently select seed tubers in the expropriation that like will produce like.

There is a difference in the vigour of strains, stocks and hills. Whether this difference is wholly due to the influence of disease or is to some extent inherent, may be left to the plant pathologists and the geneticists to decide. The practical fact is that some potato plants are more vigorous and productive than others and that in reproducing from these the possibilities of profit. If one will, during the summer, stake a number of the best hills (being careful to avoid, not only dwarfed or unhealthy plants, but also those exhibiting the abnormally large top growth known as giant hills) will see that any neighbouring plant suspected of harbouring virus diseases are promptly pulled and destroyed and if he will then follow up this effort by a further rigorous inspection of the tubers when dug he may improve his seed stock or at all events may arrest the running-out process which occurs when disease is allowed to creep in unchecked. At the Dominion Experimental Sub-Station, Beaverlodge, Alberta, selection has been carried further by the approved system of propagating individual tuber units under observation in isolated positions, but hill selection of plants and of the tubers from staked plants is very good.

STACKING BEFORE THRESHING

A late spring followed by heavy rains has produced a rank growth of straw and a crop which is much later in maturing than usual. Late harvests coupled with big yields of straw result in threshing operations starting much later and lasting much longer than usual. It usually happens that such a combination of circumstances results in an unusually large amount of damage to grain which has to stand too long in the stock before it is threshed. In addition, it frequently happens that winter sets in before the threshing of such a late maturing crop is completed.

Stack threshing has always been considered a sound farming practice for the man operating a small farm and depending on an itinerant thrashing machine, as it eliminates the risk of the crop being damaged by weathering or being left in the stock all winter.

The farmer may save a little on time and labour by threshing from the stock but will often lose more than he will gain as a result of depreciation in the commercial grade of his grain. It has been shown that losses due to the lowering of the commercial grade resulting from weathering in the stock frequently exceed the cost of stacking. It has also been shown that very little additional cost is involved when the grain is stacked before threshing as compared with threshing from the stock.

Stacked grain is safe from further injury due to climatic conditions. It goes through a natural process of sweating in the stack and as a result, threshes more easily and gives a bright, clean sample of threshed grain that may be stored in a bin of any size with assurance that it will keep in good condition.

While stacking improves the color and quality of the threshed grain of any of the cereals it is of particular benefit to barley intended for the malting trade where color is reflected in the quality of the product produced.

The farmer operating in the park belt of the Prairie Provinces would be well advised to ensure his late maturing crop against damage due to weathering in the stock by stacking as soon as possible after harvest.

PRAIRIE WATER DEVELOPMENT

(Hon. Robert Weir on Water and Irrigation Problems)

"Farmers and ranchers throughout the drought area of the three prairie provinces are showing intensely keen interest in the work of the water development committee which has been organized as part of the Prairie Farm Rehabilitation Act," according to Mr. Robert Weir, Dominion Minister of Agriculture.

The problem of supplying a more adequate and dependable water supply for domestic use and livestock, and for irrigation where feasible, for the growing of feed and garden stuff is a vital one on many farms and ranches," said Mr. Weir. "The tremendous demand for the assistance that is being made available in solving this problem is made evident by the fact that since the general program was first announced only a few months ago over 4800 individuals have made application, either directly through the municipalities or organizations, and applications are at present pouring into the office of the water development committee at Swift Current, Saskatchewan, at an average rate of over 47 a day. Since the program was announced in more detail little more than a month ago the number of applications have on two or three days exceeded the 100 mark."

"Of the total applications received to date, nearly 350 are from Manitoba, over 2800 from Saskatchewan, and somewhere around 1400 from Alberta."

"The task of giving these applications attention is an enormous one," explained Mr. Weir. "And while the organization work of the staff is still in process engineers are in the field and to date have completed surveys for over 50 projects. Field work was started little more than three weeks ago with four field engineers and their helpers. Since then the field staff has been enlarged to 21 engineers including field engineers and their assistants. Surveys and inspections are being made throughout the drought area of the three prairie provinces and while all applications received cannot be given immediate attention the work is being planned to serve as much an area as possible. Special attention is being given to dugouts for stock watering and to smaller irrigation projects where water supply is available. One engineering party is engaged on the larger projects and an additional party is being organized for this purpose very shortly."

"The task of giving these applications attention is an enormous one," explained Mr. Weir. "And while the organization work of the staff is still in process engineers are in the field and to date have completed surveys for over 50 projects. Field work was started little more than three weeks ago with four field engineers and their helpers. Since then the field staff has been enlarged to 21 engineers including field engineers and their assistants. Surveys and inspections are being made throughout the drought area of the three prairie provinces and while all applications received cannot be given immediate attention the work is being planned to serve as much an area as possible. Special attention is being given to dugouts for stock watering and to smaller irrigation projects where water supply is available. One engineering party is engaged on the larger projects and an additional party is being organized for this purpose very shortly."

"The task of giving these applications attention is an enormous one," explained Mr. Weir. "And while the organization work of the staff is still in process engineers are in the field and to date have completed surveys for over 50 projects. Field work was started little more than three weeks ago with four field engineers and their helpers. Since then the field staff has been enlarged to 21 engineers including field engineers and their assistants. THE BOOK

and which contains the King James Version of the Holy Bible

by BRUCE BARTON

"The Holy Bible"

THE KING JAMES VERSION

King James I. of England, appointed forty-seven scholars, high church men and Puritans and those who were of no ecclesiastical party, to make a new version of the Bible. Some of them had special skill in Hebrew and Greek; some were able to bring help from their knowledge of translations in the Italian, German, French and Spanish. After four years of work they gave to the world that classic, that "well of pure English, undefiled," the King James Version.

Perhaps no version in the English language will ever equal in rhythmic beauty that of the King James Version of 1611, but it is right that other versions and even new translations should be made. Each of these makes a contribution toward our better knowledge of the original.

In 1885 the Revised Version was made by a joint commission of English and American scholars. Reference will be made in the next chapter to the wide interest in and influence of this scholarly version.

It was agreed that the American members of the commission should issue a new version of their own for fourteen years. In 1901 appeared the American Standard Revised Bible, which is, at this date, the best available text in English. Other worthy versions continue to appear, as those of Moffatt, Goodspeed and the Riverside Bible translated by Professor William G. Ballantine.

Probably no one of these will presently supersede the King James Version, but each has its value for comparison. While no important doctrine has at any time depended on any of these translations, it is proper that the very best and most

made throughout the drought area of the three prairie provinces and while all applications received cannot be given immediate attention the work is being planned to serve as much an area as possible. Special attention is being given to dugouts for stock watering and to smaller irrigation projects where water supply is available. One engineering party is engaged on the larger projects and an additional party is being organized for this purpose very shortly."

scholarly minds should be engaged, as they are, in the effort to secure the nearest possible approach to a perfect text.

The two critical sciences which deal with Bible study are not with reason, to have called forth the most severe discipline to which the human mind has ever been subjected in critical study.

There may be readers of these essays who expected an affirmation that God in some supernatural way showed men just which books to select, dictating through all the ages the exact language of the original and teaching how to translate it free from error.

It is a pity to disappoint them, but that is not the way it happened. The Bible rose to the place it now occupies because it deserved to rise to that place, and not because God sent anybody with a box of tricks to prove its divine authority.

Its answer to men's spiritual needs made it what it is.

WORK OR WORRY?

German girls are given their choice of a period of service at common labor in uniform or that of getting married, since only the married are exempt under a new ruling. Those in wealthier families don't like the idea. It might be easy for a boy to get a bride in Deutschland now.

10. THE LADIES

In our first article of this series we said that Skeet, although an aristocrat amongst sports, is truly democratic, that is, it is within the financial reach of everyone. More than this, Skeet is a sport for every one, young or old, and regardless of sex. Here is the established outdoor sport in which the ladies may meet the sterner sex on an equal basis.

It pays no premium to muscular strength or masculine endurance. It is a contest of wits, of keen eyes and quick nerves. Women, with faster reactions than men, may, and do, participate without any sense of handicap and with tremendous success.

The modern woman, therefore, since she is always clothed and thrilled with new sensations, finds in Skeet enjoyment far excellence. Then, too, happy family parties may be arranged for the Skeet field. Mother is no longer neglected, to stay at home with daughter, whilst the male members of the family depart to indulge in their favorite sport.

Feminine lotion, sometimes laces on the reputed kick of shaguns. But most guns do not kick, and certainly one that fits will not. A shot or two and this hazy misconception will fade into the background.

As a last word to the ladies, or for the men readers to add to their persuasive arguments when they take their women folk on the subject of Skeet, this is the hundred or so of Skeet clubs which are flourishing today in the United States, there are many hundreds of women members. Some of these, indeed, have attained a high degree of proficiency, as may be seen by referring to one of the many sporting magazines that run a Skeet page. The sport remains fascinating to those with the highest shooting skill, but at the same time enables the beginner to enjoy moderate success. Gertrude L. Travis, editor of the Women's Department of Skeet Shooting News, advises women Skeeters, in part, as follows:

"Wear comfortable clothing, loose enough for the free movement of the arms, but not loose enough to be hampering. Wear flat shoes for the firm footing necessary, and shooting glasses for eye protection. Get a gun that fits and that you can shoot without any dread. Learn to swing smoothly and follow through after the shot is fired. Observe strictly every rule of safety and of shooting etiquette. Then if you are of normal physical makeup, and have fair eyesight, and are willing to go through the primary stages that the beginner in any worthwhile sport must, you can join the group on the Skeet field, enjoy every minute of it and when the scores are posted, there is no reason why you should be in the lower bracket."

"Skeet is a sport that women can enjoy as well as men. This is not just a general statement. There are enough successful women Skeetshooters at this moment to prove this to be a fact."

This is No. 10 of a series of 12 articles on Skeet Shooting. Cut it out. When all have been clipped, you will have a complete write-up of this sportsman's sport which is rapidly becoming the rage across Canada.

Today in the United States, there are many hundreds of women members. Some of these, indeed, have attained a high degree of proficiency, as may be seen by referring to one of the many sporting magazines that run a Skeet page. The sport remains fascinating to those with the highest shooting skill, but at the same time enables the beginner to enjoy moderate success. Gertrude L. Travis, editor of the Women's Department of Skeet Shooting News, advises women Skeeters, in part, as follows:

RAIN DROPS

FILL BARREL

The rain water that collects in an

abandoned barrel will eventually fill

the barrel unless somebody comes

along and turns it upside down.

While the drops are small as they

descend they are numerous, and, as

length, there is plenty of water, up

to the capacity of the barrel.

The above paragraph is plain and

no one would dispute the facts.

Wainwright is a barrel, upturned

to the economic sky, where current

coin is like rain, falling to the

ground of commerce in little drops

of trade.

The money that falls into this fat

barrel is captured for the benefit of

the citizens of Wainwright because

in the course of business the con-

tents of the barrel are distributed

among us, and used again.

A barrel of rainwater comes in

handy sometimes in case of fire. No

one would credit a man with wisdom

if, while his barn was burning, in-

stead of running to the reservoir,

filling his bucket and running to

throw it on the fire, he ran into the

woods and threw the water in the

creek that flows away from his home.

Wainwright is not exactly on fire

but its very economic life depends

upon the money that is stored with-

in it. Wise citizens are that their

coin stays home. Some citizens, very

often without thinking, send their

money into the surrounding woods,

where big timber men use it to build

up their city.

So—whenever possible—why not

buy in Wainwright?

THE CONFIDENT

COURAGEOUS LIFE

Every day the news dispatches

convey the stories of men and

women who have lost their grip.

These suicides have not been con-

fident of their ability to eventually

overcome their handicaps or difficul-

ties.

One of our readers recently wrote

and asked how he could attain the

confident-courageous attitude to-

ward life. He also wished to know

how he could gain more personal

power.

The receipt is simple, although a

thousand pages would not exhaust

a detailed elaboration. The difficulty

comes in following it.

Having confidence in one's source

is often an aid to gaining confidence

in one's powers. The finest flower-

ing of many religious systems of

thought is the idea that the soul of

man is the same essence as the

Infinite Creator. Those who need to

gain confidence in their inherent

powers would do well to think of

this several times a day. They should

read all the way that is supporting

this idea.

When they have firmly fixed in

the mind who and what they are

they will very often find that the

Then he has confirmed courageous

confidence. But how can he get to

do it? Easy! By practicing at

every opportunity on twenty-five

pounds of sand and then fifty and

then a hundred and then a hundred

and fifty and finally on the two

hundreded. He never masters the

nearer doing so than he had not

followed this method.

The same method will do much in

the matter of developing untried

confidence into confirmed courage-

ous-confidence. One should begin

the developing process by doing and

saying things of which he is only

a little bit timid.

The confident-courageous atti-

tude, like muscle power develops

through use.

TRUE

BUILDING

In the gospel of St. Matthew we

are told about a foolish man, who

"built his house upon the sand; and

the rain descended, and the floods

came, and the winds blew, and beat

upon that house; and it fell; and

great was the fall of it."

Each day with our every thought

and act, we are building our house.

A millionaire had a poor friend,

who was an architect. One day he

called the architect to him and

said, "I want you to build a house

for me. Use the best material that

money can buy. Do not bother me

with any details. You draw the

plans, buy the material and come to

me only when you need money."

The architect gladly accepted the

contract. He started work at once,

but a tempting thought came. "Here

is a great chance to make money."

This thought took such complete

possession of him that he lost sight

of the perfect house which he was

going to build.

He bought the cheapest material

which he could find. When the

poorly built house was almost

completed, one of the workmen said,

"This house will fall and kill some-

body," but the architect did not

care. He was making money!

He presented the bills to the

millionaire as for the most expensive

material. The millionaire, un-

questioningly wrote a check for the

amount.

Finally, the architect went to the

millionaire and said, "Your house

is completed and ready for your oc-

cupancy."

The millionaire replied, "My dear

friend, I have always wanted to see

you living in your ideal home. Al-

though you little suspected it, you

were building this house for your-

self and it is a great pleasure to me

to present this beautiful house to you

as a gift. I hope to see you

spend many happy years in it."

Whom had the architect cheated?

As we build our mental houses, it

is well for us to remember that we

are the ones who will live in them.

Are our foundations going to be

sand; greed, dishonesty, selfishness,

hatred, envy, or laziness? Or the

solid rock of love, truth, generosity,

unselfishness, kindness, purity and

activity? Do we want to live in a

shack or a mansion?

FARM LIFE DRAMA

COMES TO ELITE

For this week-end, September 5

and 7, The Elite theatre presents

"As the Earth Turns," a story rich

in drama of the lives of those who

arrest a frugal living from the

rugged Maine soil. This play truth-

fully mirrors every day farm life,

with all its hopes and ambitions, its

disappointments and tragedies and

this should prove of special inter-

est to many in this community

and district.

City bred Stan Janowski brings

his parents and brothers and sisters

to Maine to try their luck in the

rural districts. The true of this

story covers the four seasons. Spring

sees the romance beginning be-

tween Stan and Jen, one of his

neighbor's daughters. Summer sees

Stan's crops fail, a discouraging

blow for all. The harvest season

rolls on with empty barns for Stan

and full barns for Mark, Jen's

father. Interludes show sequence

love affairs, which all add their bit

of quaint rustic charm. Winter sees

Stan forced to give up the farm and

return to the city. Spring again and

Stan has funds again to take up

farming. His romance with Jen is

just about shattered through the

interference of another girl, when

things are set aright and all ends

well.

An atmosphere of humaneness

permeates the entertainment. Per-

haps you have read the book which

is one of the latest. At any rate be

sure and see the show and your time

will be well spent.

In The Mail Bag

We are not responsible for opinions

expressed by our correspondents.

RIGHT OR WRONG?

The Editor:

Dear Sir—Recently I read an

opinion and some figures regarding

"mechanical men" replacing muscles

of man today and "taking the bread

out of his mouth," because, he says,

man is too clever today. Apparently

I'm despised by man's progress in-

stead of being elated, unexplained

ancient figures are used to argue a

need to return to the horse and

buggy.

Others seem to be sleeping on</

AMONG THE OLD-TIMERS

"REMINISCENCES OF OTHER DAYS"

20 YEARS AGO

At the baby competition in town great enthusiasm was shown by the mothers. The awards went to the baby of Mrs. J. McCann and Mrs. E. Ganderion's bouncing baby.

Mr. James Primrose, formerly of the local Merchant's bank staff, spent two or three weeks with his parents in town.

In the recent tennis tourney, in the mixed doubles final, Mr. W. T. Webb and Mrs. A. E. Mills beat Mr. E. K. Smith and Mrs. R. K. Swinerton.

At the big local fair, Wainwright won the baseball money from Gila Edge by a score of 7-1, after a hard fought tussle and a couple of free rights.

Mrs. Dr. McQueen is entertaining one of Wainwright's former old timers in the person of Mrs. W. Small.

15 YEARS AGO

Quite an entertaining program has been planned for the world-wide journalists who plan to visit Wainwright on Thursday. Among the noted guests are such names as Sir Frank and Lady Newnes, Sir Emsley

and Lady Carr and many others. Mr. W. Huntingford, a member of the Empire Press Union has charge of things in Wainwright, which we predict will remain long in the memory of the visitors.

Mr. J. H. Dawson had the misfortune to be badly kicked by one of his horses on Saturday and has been, bed-ridden since.

Superintendent A. G. Smith of the Buffalo park, shipped a young buffalo to Jasper on Sunday. It was prepared for a barbecue which was given for the Imperial Press party there on Tuesday.

A happy group gathered at the home of Mrs. R. K. Swinerton, who entertained in the form of a shower in honor of Miss Grace Ward, who plans to be married shortly.

After a holiday with friends and relatives at Brandon, Manitoba, Mrs. J. Maddier returned home last night.

Sympathies are extended to Mr. H. Redgewell, who is suffering badly from an attack of rheumatic fever. Mr. George Glass of Toronto, is spending a holiday in town on a visit to his father, Mr. Wm. Glass, and his aunt, Mrs. H. Y. Pawling.

Subscribe to "THE STAR"

SLIGO

Mrs. Orla Minson returned from the hospital last week where she underwent an operation for appendicitis. We wish her a speedy recovery.

Mrs. M. Postans left on Sunday accompanied by her daughter, Mrs. B. A. McDougall and family, for Sligo, Alberta. They visited Mrs. Postans' daughter, Mrs. Appin and returned on Monday.

Miss M. Murdoch returned on Monday and is ready to start work again at Sligo school.

Miss C. Broad, of Edmonton, spent the week-end with Mr. and Mrs. W. J. Reynolds.

TRAFALGAR

Miss Marie Perkins motored over to Wildmere on Friday last. She will be in charge of the Preston school for the coming term.

School opens on Tuesday, September 3rd.

Miss Levagood of Didsbury will have charge of Trafalgar and Miss E. Hart will again take charge of Gerald.

Those attending High School in Wainwright from this district are: Misses Irene Perkins and Doris Murry, and Mr. Alex Ratray.

appeared in newspaper organs published by Pool grain handling organizations and misleading statements to the same effect have been circulated and repeated throughout the countryside.

The Wheat Board Bill as originally introduced in Parliament made no provision for a guaranteed minimum price to the farmer. The producer was to get an initial payment and a participation certificate similar to the method followed under the Wheat Board of 1919. Mr. Richardson advocated that the farmer be given a guaranteed fixed minimum price. The bill was subsequently amended by the committee to provide for this proposed fixed minimum price to the farmer. In the course of his evidence dealing with the need of assisting in obtaining a fair price for the producer, Mr. Richardson said:

"If our government wants to give our farmers financial assistance under existing conditions (and I would certainly like to see them do it), then there are several ways that this can be done. I consider it is possible to assure our producers a guaranteed price, but still to permit an open market, so that if our market declined below the fixed price the farmer would get a certificate from the elevator company entitling him to collect the difference between the fixed price and his wheat actually realized. The farmer might, on the other hand, if through advice he paid a direct subsidy. It is a government problem as to how this matter may best be met, but it must be met as a fact that the foreign buyer will continue to buy wherever he can buy the most wheat for his money. If he will take full advantage of depreciated currencies in certain parts of the world, and if he is so inclined to subsidize citizens of other countries, I would rather like to see the farmer assured of a fixed minimum price, that would give him some protection against depreciated currencies in the southern hemisphere, and a board with authority to use stabilizing influences in the market. If I thought it was necessary, and to feed out our surplus wheat and when the market would take it, and to allow the trader the largest possible freedom, and to act as a stabilizing factor, as an insurance against the farmer's operating largely in that way would depend, of course, a good deal on good judgment being employed. These persons who have sought to place Mr. Richardson in a wrong light in the minds of the farmers of Western Canada have available to them the above statement. Yet they apparently sought to mislead the farmers when they said that it is difficult to catch up with misrepresentation and falsehoods."

Mr. Richardson feels that in addition to production costs, farming industry, like other forms of business, should reap a fair margin of profit.

Mr. Richardson has spent his entire working life in the grain business. The firm of which he is now the active head commenced handling grain of Canadian farmers in 1857. For 78 years it has served the grain producers of Canada, and it will continue so doing in the same fair and efficient manner that has characterized all its dealings.

Restoration of wheat prices to a profitable level to the producer and the sale of Canadian wheat, rather than its storage in the bins of Canada, are the end to which Mr. Richardson has worked and will continue to work. Mr. Richardson, operating in the handling and exporting end of the Canadian grain business, has the interests of the Canadian farmer much more to heart than those who have caused loss of markets for Canadian wheat and who now seek to bury their folly by spreading false and malicious statements concerning the grain trade and those engaged in the grain business in the hope of causing elimination of sound competition.

In view of the quotations of the exact words used by Mr. Richardson before the committee, we believe we can rely upon every fair minded farmer to condemn the untrue statements that have been made and the unfair inferences that have been drawn—JAMES RICHARDSON & SONS LIMITED—Advt.

SYDENHAM

Mrs. R. Reid was a guest on Sunday at the home of Mr. H. Dowling. Mr. and Mrs. J. Ruste were dinner guests on Sunday at the home of Mr. and Mrs. W. G. McKay.

Mr. and Mrs. O. Croteau motored to Edmonton on Monday, returning the following day.

Holidays are over; September 3rd will see the pupils back at their studies. Miss M. Sinclair will be in charge.

Miss Ruth Ruste returned from Edmonton on Tuesday after spending a couple of weeks with friends.

Miss Hilda Daugherty returned to her home on Saturday, after spending the week with Miss June Seabrook.

A Gospel meeting for adults and Sunday school will be held for children on Sunday at the schoolhouse at 2:30 p.m. Everybody welcome.

HOPE VALLEY

Miss E. Street is spending the week-end with Miss D. S. well.

Mr. G. Matheson and his bride-to-be are journeying to Kitchener on Sunday last.

Mrs. F. A. Leck and her two daughters returned to Calgary this last week, after spending a couple of weeks with relatives in the district.

PASSCHENDALE

Mr. and Mrs. Phil Demaree and daughters Misses Peggy and Phyllis, of Kellogg, Idaho, are visiting Mrs. Demaree's relatives, Mr. and Mrs. W. M. Johnson.

Miss Jacobs of Edmonton is visiting Mr. and Mrs. J. Barrett.

Mrs. W. M. Johnson entertained at tea last Friday afternoon. Her guests were: Mrs. P. Demaree, Mrs. W. Gray, Mrs. S. Thompson, Mrs. C. Johnson, Mrs. Jack Ballentine and Misses Jean Gray, Doris Anderson, Shirley Thompson, Mildred Johnson, Margaret Steele, Peggy Demaree and Phyllis Demaree.

ASPEN

Mr. Robert Smith, of Langley, B.C., is again back in the district for a few days.

Miss Ester Challenger was a tripper to the city during the week.

Mr. and Mrs. Armstrong are back in the district again.

School will soon be on the go again.

We are sorry to report that Mrs. Vic Wheeler is on the sick list again and has been taken to an Edmonton hospital. We all wish her better.

The East Indian gods are said to be rhythmic. Well, how about the Good old Hebrew God who keeps the stars in their courses, the seafowls swooping, and the tides ebbing, and flowing twice in twenty-four hours without too much friction?

GREENSHIELDS

House Lake School started the new term, on Monday morning, with Miss J. Middlemass in charge.

Miss H. Kennedy returned to the district Monday to begin her duties Tuesday morning.

Mrs. I. Stoffer had the misfortune to break her arm again. We hope she'll soon be able to use it.

Miss Audrey Greer visited Misses Marcella and Dorothy Pfister last week.

On Friday evening the Green-shields Young People's Club held a farewell party in honor of Miss Doris Daniels, who is leaving for Canmore Normal school.

On Wednesday afternoon, Mrs. Stuart and Mrs. Huntingford, accompanied by her two sons, Walter and Gordon, visited Mrs. R. H. Ott.

Miss Margaret Spence returned from Edmonton on Sunday and spent Labor Day with Miss L. Morrison.

The Misses Beth and Jean Elder, Wainwright, and Carol Brunk and Hazel Stuart, spent Monday with Mr. and Mrs. R. H. Ott.

Miss Janet Carl, of Edmonton, is enjoying her annual holiday at the home of her parents, Mr. and Mrs. R. Carl.

EUROPEAN ROYALTY GATHERS TO ATTEND FUNERAL RITES

BRUSSELS—Dowager Queen Elizabeth of Belgium, and her daughter, Princess Marie Jose of Piedmont, arrived from Naples Saturday, heading the royalty coming from all Europe for the funeral of Belgium's ill-fated Queen Astrid.

Many thousands of the populace, braving a cold, inclement drizzle, waited their turn for a parting glance at their beloved young queen. The body of Astrid rested on a white silk bed, flanked by burning tapers at her head and feet. Her chin and neck were bandaged heavily, but otherwise her features were unmarred by the automobile accident which catapulted her through a windshield against a tree on the shore of Lake Lucerne, Switzerland. At Balmoral, Scotland, His Majesty the King named the Duke of York to represent Great Britain at the funeral of Queen Astrid of the Belgians Tuesday.

ALBERTA STOCK WINS AT COAST

VANCOUVER—Alberta exhibitors were well up in the livestock ranks at the Canada Pacific exhibition recently. Canadian Pacific railway entries from the Strathmore farms swept the 13 places in the Percherons, from stallions, mare and fillies to progeny of dam and get of sire. The J. J. Richard estate at Red Deer, captured six prizes in the Ayrshire category, including senior and grand championships and reserves. The Red Deer entries also won the junior championship and reserve bulls in the Ayrshire dairy cattle class.

Never fear that worry will make you thin. Ask about a million fat folks.

Richardson Denounces False 40c Wheat Production Cost Figures Attributed To Him

Deliberate Attempt Made to Mislead Public Concerning
James Richardson's Evidence Before
Wheat Board Committee

Advocates Profitable Price to Farmer

Certain farm agitators and propagandists have been attempting for some years to inflame the public mind against the Grain Trade and those associated with it. The methods have been to issue unfair propaganda and to place a false and unbounded interpretation on the words and actions of those whose views differ from their own. A glaring example of the sort of misrepresentation referred to is cited below, and must meet with the strong disapproval of fair minded farmers in Western Canada.

Mr. James A. Richardson, President of James Richardson and Sons Limited, on June 21st and June 22nd, 1935, appeared at Ottawa before a Special Committee of the House of Commons hearing representations in connection with the Canadian Wheat Board Bill.

Following presentation to the committee of his statement covering various phases of the Canadian Grain Trade, Mr. Richardson was examined by the Prime Minister, the Right Honourable R. B. Bennett. In the course of this questioning a discussion took place concerning the cost of producing wheat in Western Canada. The evidence and examination of Mr. Richardson required some hours and occupied more than 45,000 words. The excerpt from the verbatim report of the proceedings dealing with the discussion on cost of producing wheat reads as follows:

Right Honourable R. B. Bennett: "Now, Mr. Richardson, how much do you think the farmer should be paid for his wheat in order to break even. You have had a large experience in all branches of the business, how much should he have, and to make a profit, but just to break even?"

James A. Richardson: "Well, I have heard farmers say if they had a fair crop of wheat and got 40 cents on the farm they could get by, they would not be in debt, they would not be in debt, but they could get by all right."

Mr. Bennett: "Forty cents on the farm?"

Mr. Richardson: "Yes."

Mr. Bennett: "In Alberta that would mean what price on the market for No. 1 Northern, you mean No. 1 or No. 2 at forty cents?"

Mr. Richardson: "Well, I would say the No. 1."

Mr. Bennett: "No. 1 at forty cents on the farm?"

Mr. Richardson: "I suppose forty cents would apply in connection with all that he had."

Mr. Bennett: "Now, what you mean. Now, Mr. Richardson, that being so what would the price be on the market for that sort of wheat how much would you have to allow for freight?"

Mr. Richardson: "Well, 15 cents a bushel would be high, it would be a top freight."

Mr. Bennett: "That is the top freight, isn't it?"

Mr. Richardson: "Yes, sir, 12 cents average freight."

Mr. Bennett: "So that to the people in the country it should be 40 cents; you think that would be a satisfactory figure for the farmer?"

Mr. Richardson: "No, sir, I do not. I want to see the farmer get just as high a price as we could sell his wheat for in the world's markets. I am not satisfied to indicate any price, other than the best price we can possibly get for him."

Mr. Bennett: "You see, what has been suggested by one of the witnesses is that the government through a board should establish a minimum price and if wheat went below that price it should be subject to subsidy or assistance. The Chairman of your own grain exchange

The Divorce Court MURDER

BY MILTON PROPPER

© HARPER & BROTHERS, INC.

SYNOPSIS—Barbara Keith wife of a prominent Philadelphia business man, is murdered as she waits in a side room to testify in the divorce case of Rowland vs. Rowland. . . . She was to have testified for the husband, a friend, who was defendant in action. . . . Detective Tommy Rankin is assigned to the case from police headquarters. . . . His preliminary investigation disclosed that both Mr. and Mrs. Rowland had gathered evidence against the other of infidelity. . . . The will of Mrs. Rowland's first husband directed her lawyer brother Mr. Willard, to handle the estate until she remarried when the new husband was to come into control. Detective Rankin finds motives and the evidence of guilt for the murder of Mrs. Keith, leading to the doors of virtually all of the principals involved. These principals are, the two Rowlands, Mr. Willard, Mr. Hugh Campbell, paramour of Mrs. Rowland, and his underworld confederates. . . . NOW GO ON WITH THE STORY.

Wisely, Miss Edmond made no effort to deny the charge. "Where did you learn that?" Rankin returned provocatively. "The in-

formed me of your entire part in the divorce case. They may have agreed to pretend an affair with the husband. And how you climaxed the 'intrigue' with the affair at the Inn." He smiled contemptuously.

As he intended, anger burned in the girl's eyes, as much directed against her erstwhile confederates as against his insulting comments.

"They told you that? But it was their plan; I had nothing to do with it and had no interest in it, until I innocently took the job as secretary."

"Just the same, you've conspired to defend justice and commit perjury under oath," the detective put in coldly.

Jill Edmond's resentment, increasing with her alarm, loosened her tongue.

"I won't be a fool for them." She clenched her fists. "They may have told you a lot, but they left out even more. You haven't heard yet that they tried to doublecross Mr. Rowland. There was a woman he really loved—for whom he wasn't faking an affection, and they attempted to catch him with her—his real mistress."

"His real mistress? What do you mean—he was unfaithful, after all?"

"Yes, he had a mistress; and here is more news to surprise you," Miss Edmond spoke triumphantly. "They didn't tell you her name, either, Mr. Rankin; it was Barbara Keith—Mrs. Mortimer Keith? It was with her, not me, that he went to the Sunset Inn, February first, to spend the night!"

"Mrs. Keith?" Rankin ejaculated. "Good heavens, how can that be possible?"

He could hardly credit his ears. He had expected information from the girl, but never, in his wildest speculations, such a startling, overwhelming revelation.

"To clear up this whole business for you, Mr. Rankin," she related, "I had better begin at the beginning. What they said about hiring me and planting the impression Allen and I had an affair, is probably correct; they'd have no reason to lie about that. Up to the day we

chose for the final discovery, everything went according to plan. It was arranged to catch us together, Thursday, February second; you know, as secretary, I had every Thursday off and usually spent it with Allen to increase affection. He was to write a note, making an appointment to meet me that night at eight o'clock in town. Mrs. Rowland would supposedly discover it, turn it over to her brother and Dorkin, and the three of them would watch our meeting. Then, to produce proofs of our relations, Allen and I were to drive to the Roudine Hotel, thirty miles out along the Lancaster Pike and there be trapped in a bed-room together."

"The detective's face screwed into a baffled, uncomprehending frown.

"This was set for Thursday, the second? But according to Mr. Willard and the testimony," he objected, "the climax really was 'held' the day before, Wednesday, February first. And it took place at the Sunset Inn, instead."

Jill Edmond smiled vindictively. "Yes, that's so; that is where the double-crossing comes in. The whole program was advanced one day by Mrs. Rowland's treachery in trying to drag Mrs. Keith into the scandal. She failed only because I was too much for her. At the hearing afterward she couldn't prove anything against Mrs. Keith, so she, Mr. Willard and Allen had to stick to the story they originally planned, and change only the necessary minor details, such as the date of the scene. After all, so far as Dorkin was concerned, he witnessed on Wednesday substantially what we planned him to see on Thursday, and that was the evidence he offered."

"Since I could not signal Allen, I followed both cars to wait for a later chance. All the way to the Inn, I trailed behind Mrs. Rowland while she trailed him. At the Inn, I drove ahead and parked on the opposite side. But while Mr. Willard's crowd delayed until Allen and Mrs. Keith were settled in their quarters, I acted. I could tell from the new light on the second floor, the location of their room. Without stopping to ask at the desk, I entered and went directly upstairs as if I were a expected visitor. When I knocked at the door, there was a dead silence until I announced my name; then Allen opened it cautiously for me to come in."

"Mrs. Keith was panic-stricken," the secretary dramatically proclaimed, "half fainting and trembling in terror; she cried about being ruined by the scandal. Allen had the presence of mind to realize that he had to save the reputation of the woman he loved. He sent both of us into the bathroom to exchange clothes. Luckily, we were about the same size. Then I gave Mrs. Keith, the key to my room, and Allen ordered her to drive back to the city immediately."

"Even so, she had barely a moment to spare. As she stepped into the hall, Mrs. Rowland, her brother and Dorkin were already climbing the stairs. To escape them, she had to slip into an upper bathroom several doors down the corridor. Then she waited until everyone rushed into our room before she sneaked out and ran down to my car. She probably just missed meeting Mr. Keith on the way. The girl flicked away her cigarette ash and shrugged her shoulders

carelessly.

"The rest of the story must be fairly clear from the records of the hearing," she concluded. "Allen and I were well compromised by the interruption; we acted dismayed and guilty, precisely as it had all been planned for the next day. Though I almost spoiled it by laughing at Mrs. Rowland's rage and mortification and Mr. Willard's amazement. During the confusion, they searched the room, closets and bathroom for Mrs. Keith. Yet they had to carry out the scene, not daring to demand where she was or question the substitution. That would have given away their knowledge of the whole secret and admitted the collusion."

After a moment of deliberation, Rankin said:

"I suppose that covers all the ground, Miss Edmond, except for one original question. Do you think Mr. Keith went to the Inn because he suspected his wife would be there with Rowland?"

Again he sensed in her that quick wariness.

"I'd say it was something like that."

"That's very important," Rankin returned graciously. "You had no reason to shield Mortimer Keith in this business, had you?"

"The girl looked startled. "Of course not, Mr. Rankin," she answered vehemently.

"You also failed to inform me," Rankin pointed out severely, "that on the afternoon of the murder, Mr. Keith visited the lawyers' office. He arrived about when you did, twenty-five. You couldn't help seeing and recognizing him in the hall, could you, yet you concealed that fact from me."

"Mr. Keith there?" Jill Edmond's attempt at surprise held a false note. "I swear I didn't know, Mr. Rankin; I neither saw him or leave."

At the sudden inspiration that occurred to him at that instant, Rankin shook his head vaguely.

"Perhaps I can suggest a better reason why you wanted to protect him; you found it profitable to tell him the truth."

The secretary's eyes widened with terror.

"That is called blackmail, Miss Edmond," he went on, "a much graver offense than obstructing justice. You threatened to make public Mrs. Keith's infidelity unless it was made worth your while not to."

"No, no, that isn't what happened at all!" Jill Edmond's alarm cry interrupted. "I had done him a service he would appreciate; at the end of my character, I had saved his wife's honor and his from public disgrace. Surely it wasn't too much for me to expect some reward!"

"And in that way, profit at both ends for the same thing," Rankin declared curtly. "I want to see him as soon as I got Allen to admit who he was. And he was perfectly willing to let me have the money."

Altogether the detective rose, his mouth grim and ominous.

"Miss Edmond," he warned her, "this is your only chance; hold your tongue and be prepared to testify to his knowledge when called to do so."

"Yes, yes, Mr. Rankin," Jill Edmond promised only too fervently. "And thank you; you can depend on me not to breathe a word to anyone."

Rankin's faith in Barbara Keith was destined to receive an even more severe strain that very night when he reached the Central Detective Bureau.

(Continued Next Week)

**BERMUDA FISHING
IS TRULY IDEAL**

WINNIPEG, Man.—Captain Paul A. Curtis, prominent American fisherman and author of "Bermuda Fishing and Sport," of New York, on a trip through Western Canada over Canadian National Railways, for material for articles on duck shooting and the problem of conservation of game birds.

Capt. Curtis told the interesting story of how he had recently "founded a new industry," game fishing, in Bermuda. He went to Bermuda in the middle of February, this year. Although fishermen cruised within the coral reefs of the island fishing for bass and other deep water fish, no one had ever before exploited the possibility of trolling for the big game fish.

After obtaining the proper equipment from New York, Capt. Curtis began to fish the Atlantic past the coral reefs. In his first three hours he caught three tunny. In his first week of 17 hours fishing he caught 17 of the big fighters. Game fishing is now a great attraction of the island.

"For a Canadian fisherman who wants to do his deep sea fishing from British territory and wants to travel back and forth with Canadian travel companies, Bermuda is the ideal place," said Captain Curtis.

It has been said that rest is rust. Not so for a summer vacation after a busy year of work. Then rest is oil for the wheels and makes the old machine run smoother for another year.

SANDWICHES FOR ALL OCCASIONS

Sandwiches are what we make them. They may be make-shift bites, with little to be said in their favor, or dainty morsels that bring bursts of praise to the hostess whenever they are placed before guests.

It is far too easy to put a piece of ham or cheese between two slices of bread and call it a sandwich. We are likely to get into this foot rut if we do not watch ourselves.

But the woman who prepares her sandwiches as carefully as she bakes a cake will be repaid amply in respect and compliments. Sandwiches should be dainty—whether for a picnic, a bridge lunch or a buffet lunch.

Combination sandwich fillings should be cultivated. Instead of using plain cheese use a combination of cheese and mustard pickles. As a matter of fact, the pickle shelf is used the whole year round to build up attractive sandwiches for the lunch box. When you do not desire to include pickles of some kind in the actual filling, two or three pickles wrapped in waxed paper may be thrust into a corner of the lunch box and you may rest assured that they will seldom, if ever, come back to you at night—or for a buffet lunch, various kinds of pickles may be placed near the sandwich tray.

Here are several recipes showing how pickles of various kinds may be used in sandwiches.

Spley Celery Sandwich

2 large sweet pickles (1/4 cup) finely chopped

1/4 cup celery, finely cut

1 tablespoon mayonnaise

2 tablespoons catsup

Combine chopped sweet pickles and celery. Blend with remaining ingredients. Spread this filling on slices of buttered bread.

Hot Ham Sandwich

Have ready hot buttered toast, two slices for each sandwich, and lightly broiled sugar ham cut very thin. Arrange a slice of the ham on a slice of the toast. Add a bit of prepared mustard and cover with minced sweet pickles. Put the top slice of toast in place. Serve at once.

Bacon and Pickle Sandwich

6 slices crisply broiled bacon, chopped

3 medium-sized dill pickles, chopped

1/4 cup mayonnaise

Combine bacon, pickles, and mayonnaise. Spread on buttered bread. Makes 6 sandwiches, 4 x 4 inches.

Savory Minced Cheese Sandwich

1/2 pound American cheese

1 tablespoon butter

1 teaspoon mustard sauce from mustard pickles

1/4 cup mustard pickles, finely chopped

Salt

Paprika

Allow cheese to stand in a warm place to soften. Mash the cheese and blend with butter. Add remaining ingredients. Spread on thinly sliced whole wheat or rye bread, buttered.

RIBBON SALAD

Dissolve a package of lemon-flavored gelatin in 2 cups of boiling water, add 1/2 teaspoon salt and 1 tablespoon of lemon juice and chill. Dice a red apple without peeling and 1 teaspoon of sugar and 1 tablespoon of lemon juice. Divide the chilled jelly into two parts; add the apples in one part, turn into a mold and chill. Beat the other part to a stiff froth adding a package (3-oz) of cream cheese and 1/2 cupful of Brazil nuts chopped coarsely. Pour over the apple layer and set away in the refrigerator. When serving, cut in small squares, place on lettuce

Hints for the Household

Conducted By Betty Barclay

SANDWICHES FOR ALL OCCASIONS

Sandwiches are what we make them. They may be make-shift bites, with little to be said in their favor, or dainty morsels that bring bursts of praise to the hostess whenever they are placed before guests.

It is far too easy to put a piece of ham or cheese between two slices of bread and call it a sandwich. We are likely to get into this foot rut if we do not watch ourselves.

But the woman who prepares her sandwiches as carefully as she bakes a cake will be repaid amply in respect and compliments. Sandwiches should be dainty—whether for a picnic, a bridge lunch or a buffet lunch.

Combination sandwich fillings should be cultivated. Instead of using plain cheese use a combination of cheese and mustard pickles. As a matter of fact, the pickle shelf is used the whole year round to build up attractive sandwiches for the lunch box. When you do not desire to include pickles of some kind in the actual filling, two or three pickles wrapped in waxed paper may be thrust into a corner of the lunch box and you may rest assured that they will seldom, if ever, come back to you at night—or for a buffet lunch, various kinds of pickles may be placed near the sandwich tray.

Here are several recipes showing how pickles of various kinds may be used in sandwiches.

Spley Celery Sandwich

2 large sweet pickles (1/4 cup) finely chopped

1/4 cup celery, finely cut

1 tablespoon mayonnaise

2 tablespoons catsup

Combine chopped sweet pickles and celery. Blend with remaining ingredients. Spread this filling on slices of buttered bread.

Hot Ham Sandwich

Have ready hot buttered toast, two slices for each sandwich, and lightly broiled sugar ham cut very thin. Arrange a slice of the ham on a slice of the toast. Add a bit of prepared mustard and cover with minced sweet pickles. Put the top slice of toast in place. Serve at once.

Bacon and Pickle Sandwich

6 slices crisply broiled bacon, chopped

3 medium-sized dill pickles, chopped

1/4 cup mayonnaise

Combine bacon, pickles, and mayonnaise. Spread on buttered bread. Makes 6 sandwiches, 4 x 4 inches.

Savory Minced Cheese Sandwich

1/2 pound American cheese

1 tablespoon butter

1 teaspoon mustard sauce from mustard pickles

1/4 cup mustard pickles, finely chopped

Salt

Paprika

Allow cheese to stand in a warm place to soften. Mash the cheese and blend with butter. Add remaining ingredients. Spread on thinly sliced whole wheat or rye bread, buttered.

RIBBON SALAD

Dissolve a package of lemon-flavored gelatin in 2 cups of boiling water, add 1/2 teaspoon salt and 1 tablespoon of lemon juice and chill. Dice a red apple without peeling and 1 teaspoon of sugar and 1 tablespoon of lemon juice. Divide the chilled jelly into two parts; add the apples in one part, turn into a mold and chill. Beat the other part to a stiff froth adding a package (3-oz) of cream cheese and 1/2 cupful of Brazil nuts chopped coarsely. Pour over the apple layer and set away in the refrigerator. When serving, cut in small squares, place on lettuce

leaves and accompany with mayonnaise.

Hawaiian Frappe

Easy to make, refreshing to taste, and an aid to digestion, is the frozen pineapple juice concoction named Hawaiian Frappe. And here is how to make it:

1 1/2 cups sugar

1 pint water

2 cups orange juice

1 quart Hawaiian pineapple juice

Boil sugar and water together for five minutes. Add orange juice and pineapple juice. Cool, strain and freeze to a mush. Serve in sherbet glasses.

Cottage Cheese Salad

1 package lemon or lime-flavored gelatin

1 cup warm water

1 cup canned pineapple juice and water

1 cup crushed crushed pineapple

1 cup cottage cheese

1/2 teaspoon salt

Dash of cayenne

Strips of red or green pepper

Dissolve gelatin in warm water. Add pineapple juice and water. Chill. Combine pineapple, cheese, salt, and cayenne. When gelatin is slightly thickened, fold in pineapple mixture. Decorate mold with strips of red or green pepper. Turn gelatin mixture into it. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise. Serves 8.

When company walks in unexpectedly at meal time, let the jolly jolly jar come to your rescue. Every lover of good food, no matter how "picky," enjoys these tasty fruit or berry spreads, either on plain white bread, or crackers, or in sandwiches. Here are two novel jams:

Coconut Apricot Jam

4 cups (2 lbs.) prepared fruit

7 cups (3 lbs.) sugar

1 cup shredded coconut

1 bottle fruit pectin

To prepare fruit, add 3 1/2 cups water to 4 cups fruit, boil 10 minutes, cover, and let stand 4 hours or overnight. Drain fruit, grind or chop fine, and mix with juice.

Measure sugar and prepared fruit into large kettle, filling up last cup with water if necessary. Add coconut, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard three minutes. Remove from fire and stir in bottled fruit pectin. Skim; pour quickly. Paraffin hot jam at once. Makes about 11 glasses (6 fluid ounces each).

Gooseberry and Sour Cherry Jam

4 cups (2 lbs.) prepared fruit

7 cups (3 lbs.) sugar

1/2 bottle fruit pectin

To prepare fruit, crush thoroughly or grind about 1 quart fully ripe gooseberries. Stem and pit about 1 quart fully ripe sour cherries, crush thoroughly or grind. Combine fruits.

Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard three minutes. Remove from fire and stir in bottled fruit pectin. Skim; pour quickly. Paraffin hot jam at once. Makes about 10 glasses (6 fluid ounces each).

CANADA'S "COMPTONITES" SOLVE PROBLEMS OF MODERN LIFE

CHARLOTTETOWN, P.E.I.—In a co-operative colony on the shore of the Bellefleur River in this province a little band known as "Comptonites" claim to have solved the problems of a complex society by living with themselves.

The colony was founded in 1909 by Ben Compton, descendant of an old Canadian family. Its members make no effort to secure converts, and they ask but to be left alone.

The Comptonites own all goods in common and use no money in dealings among themselves. They operate farms and lumber mills, and the money received from the sale of their products goes into the purchase of goods they cannot make for themselves. These are distributed through the colony store, on request without price. "We ask for the things we need, no more, and these are gladly given to us," said one member. "We do not abuse the system."

When two young people of the colony decide to marry all lend a hand in the erection of a home for them, and it is fully equipped from the communal stores. Then the couple are expected to till the soil, to work in the mills, and add to the community chest the fruits of their labors. In its limited field the system seems to be bringing contentment and harmony to the little group.

New corn and new flowers each year remind us of the inexhaustible resources of the Infinite when it comes to food, beauty and care.

SANDWICHES FOR ALL OCCASIONS

Sandwiches are what we make them. They may be make-shift bites, with little to be said in their favor, or dainty morsels that bring bursts of praise to the hostess whenever they are placed before guests.

It is far too easy to put a piece of ham or cheese between two slices of bread and call it a sandwich. We are likely to get into this foot rut if we do not watch ourselves.

But the woman who prepares her sandwiches as carefully as she bakes a cake will be repaid amply in respect and compliments. Sandwiches should be dainty—whether for a picnic, a bridge lunch or a buffet lunch.

Combination sandwich fillings should be cultivated. Instead of using plain cheese use a combination of cheese and mustard pickles. As a matter of fact, the pickle shelf is used the whole year round to build up attractive sandwiches for the lunch box. When you do not desire to include pickles of some kind in the actual filling, two or three pickles wrapped in waxed paper may be thrust into a corner of the lunch box and you may rest assured that they will seldom, if ever, come back to you at night—or for a buffet lunch, various kinds of pickles may be placed near the sandwich tray.

Here are several recipes showing how pickles of various kinds may be used in sandwiches.

Spley Celery Sandwich

2 large sweet pickles (1/4 cup) finely chopped

1/4 cup celery, finely cut

1 tablespoon mayonnaise

2 tablespoons catsup

Combine chopped sweet pickles and celery. Blend with remaining ingredients. Spread this filling on slices of buttered bread.

Hot Ham Sandwich

Have ready hot buttered toast, two slices for each sandwich, and lightly broiled sugar ham cut very thin. Arrange a slice of the ham on a slice of the toast. Add a bit of prepared mustard and cover with minced sweet pickles. Put the top slice of toast in place. Serve at once.

Bacon and Pickle Sandwich

6 slices crisply broiled bacon, chopped

3 medium-sized dill pickles, chopped

1/4 cup mayonnaise

Combine bacon, pickles, and mayonnaise. Spread on buttered bread. Makes 6 sandwiches, 4 x 4 inches.

Savory Minced Cheese Sandwich

1/2 pound American cheese

1 tablespoon butter

1 teaspoon mustard sauce from mustard pickles

1/4 cup mustard pickles, finely chopped

Salt

Paprika

Allow cheese to stand in a warm place to soften. Mash the cheese and blend with butter. Add remaining ingredients. Spread on thinly sliced whole wheat or rye bread, buttered.

RIBBON SALAD

Dissolve a package of lemon-flavored gelatin in 2 cups of boiling water, add 1/2 teaspoon salt and 1 tablespoon of lemon juice and chill. Dice a red apple without peeling and 1 teaspoon of sugar and 1 tablespoon of lemon juice. Divide the chilled jelly into two parts; add the apples in one part, turn into a mold and chill. Beat the other part to a stiff froth adding a package (3-oz) of cream cheese and 1/2 cupful of Brazil nuts chopped coarsely. Pour over the apple layer and set away in the refrigerator. When serving, cut in small squares, place on lettuce

"IT'S POOR ECONOMY TO RISK FAILURES WITH INFERIOR BAKING POWDER. MAGIC NEVER VARIES. AND LESS THAN 1¢ WORTH MAKES A DELICIOUS CAKE."

MAGIC BAKING POWDER

SAYS MISS LILLIAN LOUGHTON, Dietitian and Cookery Expert of the Canadian Magazine

MAGIC

COSTS so little—and can be depended on for uniform results. It actually takes less than 1¢ worth of Magic to make a big three-layer cake. Why risk failures? Bake with Magic and be sure!

"CONTAINS NO ALUM." This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

CENTRAL SMART INEXPENSIVE

RINGING THE BELL

Two business men were discussing the merits of advertising. One claimed that it was not necessary to advertise an old established business handling staple articles.

By way of argument he said, "Now there

is that old church over on the corner. When my grandfather was a boy they had a good crowd. When my father was a boy they had a good crowd. Today, in spite of automobiles and movies, they still have a good crowd. They have something the people want—and, they don't advertise."

The other business man, realizing that further argument would be futile for the time being, queried as he rose to go, "They ring the bell every Sunday, don't they?"

The Wainwright Star gives business and professional men and women a chance to ring the bell regularly, through the proper use of its advertising columns.

Wainwright Star

- - Diamond Jim - -

(Condensed for Reader's Digest by Parker Morell)

The scene is a lobster palace of the '90's. Centered in the room, a table, staggered under a profusion of vases; at the table, nine women and one grandiose man, two large steaks before him. He weighs over 240 pounds; eyes small and shrewd; the jaw is a fowl. Tied around his neck is an oversized napkin. If on his knee, it would have been lost beneath New York's best known atomach—a stomach starting impetuously at the neck and curving majestically down. But every eye is held, not by these things, but by the dozens of diamonds, glittering winks of light, enormous like the person. Diamond Jim Brady! Solomon in all his glory.

One evening in 1856, Daniel Brady swung into his West St. saloon, shouting, "It's a boy! 'Tis me the drinks are on this night!" And throughout the life of Jim, whose health was then drunk, it was always: "Drinks by courtesy of Brady." Diamond Jim himself never drank, but his stock in trade was in making friends with convivial men. When he was 11, Jim had thumbed his nose at the school and become a beltbody; at 15, he was joyously slinging trunks around the Grand Central baggage room; at 23, he went on the road, selling railroad supplies. He proved the most successful salesman his firm ever employed.

"If you're goin' to make money you gotta look like money." So Jim lavished care like a bride's upon his going-away outfit — Prince Albert, stove-pipe hat — but the most important item, his first diamond ring! Immediately, the Brady luck began to show. The next decade offered the greatest market for railroad supplies in history; Jim used to say that his hardest job was writing out his orders. Confusions piled up, and so did his collection of diamonds. They made money for him.

"Speaking of diamonds, you might like to see these. They're my hobby." And before the railroad official's eyes he would spread out a handful. If a tough customer exclaimed, "They're imitations!" Jim would stride to a window and write "James Buchanan Brady on the pane. His point was won—more important, his name was there to be remembered.

Jim's fame spread over the entire railroad system, and the inevitable, "Diamond Jim," became the most valuable nickname in America. His prosperity grew with the years. Still selling supplies, he became vice-president of the Standard Steel Car Company, just when steel cars were selling at a breakneck pace. Finally Jim realized, "Hell, I'm rich! It's time I had some fun!"

He entered a new world, made for Jim and he for it. Vulgar, blatant, garish, it put both hands into Jim's wallet, and Jim smiled happily. He became a chronic first-nighter, always in a front-row seat, at fashionable Manhattan beach he was one of the larger landmarks; he was among the Wall Street potentates at the Waldorf bar. Drinking only milk or orange juice, he was said to open more wine than anyone in New York. With his infallible flair for headlines, he fraternized with John L. Sullivan, Stanford White, Augustin Daly and Lillian Russell, whose beauty was enthralling. Asking only to bask in her smile, he was her close friend for 40 years. During the "Bicycle Cycle," when the world was awed, Jim bought for her a machine that evoked awe. It was gold-plated, and studded with chip diamonds; handlebars of mother-of-pearl; spokes twinkling with diamonds and rubies.

But Jim's real moment came when the newspapers announced "JAMES B. BRADY DRIVES FIRST HORSELESS CARRIAGE IN CITY. TRAFFIC TIED UP FOR TWO HOURS." He had provided a sensation for the town.

In the 1900's, people thought nothing of tackling a 14-course dinner. They were moved to wonder, however, when they saw Diamond Jim breaking bread. Not only did he eat gargantuan meals, but he put away three and four helpings of the main dishes. Then, to make the food "set better," he ate a box of chocolates. Incidentally, most of Jim's parties were charged to his now unlimited expense accounts. He had early discovered that more wares could be sold at 3 a.m. than in broad daylight. His closest friends could never determine where Jim's business left off and pleasure began. It was a new technique in salesmanship.

At the scene is a lobster palace of the '90's. Centered in the room, a table, staggered under a profusion of vases; at the table, nine women and one grandiose man, two large steaks before him. He weighs over 240 pounds; eyes small and shrewd; the jaw is a fowl. Tied around his neck is an oversized napkin. If on his knee, it would have been lost beneath New York's best known atomach—a stomach starting impetuously at the neck and curving majestically down. But every eye is held, not by these things, but by the dozens of diamonds, glittering winks of light, enormous like the person. Diamond Jim Brady! Solomon in all his glory.

To climax his orgy of spending, Jim was inspired to own a different set of jewelry for every day of the month; for a starter, the Transportation Set. It featured every animal or appliance concerned in carrying men or goods; an engine-wheel ring, with a 10-carat center and 42 smaller diamonds; a camel, a donkey, an automobile. Completed, the set held 2548 stones. The other sets followed rapidly, each of 14 items, from studs to underwear buttons, and with its own watch. To Jim it was beautiful. "You fellows talk about what's done and what ain't, but I notice, that them as has 'em wears 'em!"

Inevitably, Jim's princely habits attracted the predatory. "One night," said George Rector, "more than a dozen people came over to Jim's table to borrow money, and every time Jim brought out a handful of bills. Finally, I said, 'Mr. Brady, aren't you letting people take advantage of you?' He closed one eye in a wink: 'George, I know they are pulling my leg. But it's fun to be a sucker—if you can afford it.'"

One night in 1912, Diamond Jim lay in his great mahogany bed waiting to be rushed to Johns Hopkins Hospital for a desperate operation—a million to one chance. Roaring at others to leave the room, Jim sent his secretary for certain papers from his safe. "There's \$200,000 in personal notes here. They can't pay. Burn 'em." "But—" the secretary was aghast. "Burn the whole lot! If I'm gonna die, I'm gonna die. But I ain't gonna leave troubles behind me. Burn 'em." This was Jim's legacy to Broadway.

At the hospital, Jim caused a sensation: the fluoroscope showed his stomach six times the normal size. Directly after the operation, Dr. Young, was obliged to sail for a conference abroad. "On reaching the boat," he said later, "I found my modest stateroom changed for the best: most luxurious suite—flowers, fruit, champagne—all planned by Mr. Brady, whom the doctors had given 24 hours to live. He could think of such things while on what he considered his deathbed."

During convalescence, Jim revealed in attention. The nurses couldn't believe that all this jewelry (he bedecked himself in a different set each day) was real. He secretly ordered 50 two-carat rings; then, one by one he called in the nurses: "Here, if the pawnbroker tells you this is real, you keep it." But when Dr. Young returned, he was not thinking of diamonds or pretty girls. "Say, Doctor, this urology business is kinda interesting, ain't it? Does all this experimentin' take a lot of money?" "It certainly does, Mr. Brady," "I know, I been thinkin' I'd kinda like to help a bit. I'm a rich man, and I ain't got a damn thing to do with my money . . . Three years later the doors of the Brady Urological Institute were opened.

To the last, life was great fun for Diamond Jim. He died in his sleep in his \$1000-a-week quarters at Atlantic City. They buried him on April 16, 1917. While his body, decked out in his No. 1 Diamond Set, lay in his own house, the police had to ban the crowds paying their last respects. The entire first floor was filled with flowers, from thousand-dollar orchid blankets to ten-cent nosegays timidly laid at his coffin by newsmen who he had befriended. Except for bequests to close friends, all his money went to charity: hospitals, newsmen's lodging houses, an orphan asylum, the Children's Aid Society. Diamond Jim had realized the truth: "It is more blessed to give . . ." but he would have expressed it: "Hell, what's money to me! I gotta have some fun!"

NEWS & VIEWS OF TOWN AND DISTRICT

BORN—To Mr. and Mrs. W. Skinner, at the Wainwright municipal hospital on August 29th, a boy.

BORN—To Mr. and Mrs. Glen Haire, at the Wainwright municipal hospital, on September 1st, a girl.

BORN—To Mr. and Mrs. H. Coffield, at the Wainwright municipal hospital, on September 3rd, a boy.

Miss Y. Bisson was visiting friends in Edmonton over the week-end.

Mrs. Masters arrived from Winnipeg during the week and is now engaged at the Station restaurant.

Mr. Mel Hugst was over from Hanna for the holiday to visit friends.

After a week's stay in town, the surveyors who were camped north of the town have now gone on east.

The workmen are now rapidly closing up the gap on graveling the highway west, several trucks having been already laid off.

Mr. H. Bates, who is with the C.N.R. at Saskatoon, with his wife and brother Nelson, who is manager of a department in the big Simpson store in Toronto, all spent the week-end with their uncle, Mr. A. J. Martin, east of town.

George Cowley was up from Biggar for the holiday with his parents here.

Fill your walls and over the ceilings of your home with specially prepared insulating shavings which keep out cold and dampness at the lowest cost of any material yet discovered for this purpose.—Sold at Atlas yard; Joe Welch, agent.

Miss Myra Neal, of Alliance, was here for a day or so at the week-end for a trip.

On Sunday last Alberta was thirty years old as a province, it having been erected Sept. 1, 1905, and named after Princess Alberta Louise, marchioness of Lorne.

Owing to news that her mother is very sick at her home in Ottawa, Mrs. W. A. Knowles left for that city hurriedly last Friday.

Miss M. Levagood, the new teacher at Trafalgar for the coming term, arrived in town last week-end.

Lawyer Shortreed of Hardisty was in town on business for a day or two last week.

Miss L. Bruce, of Alliance, was visiting with friends here for a couple of days at the week-end.

Misses Grace and Bessie Welch left on Monday to take up their teaching duties at Big Valley and Thorhild, where they have been engaged for the past three years.

Messrs. T. Madkins and Roy Hartling, who have been working in the oilfield down at Tabor, are now back visiting their families.

Mr. R. Prosser was here from Alliance to spend the holiday with his parents in town.

Ask the Wainwright Pharmacy about handling your second-hand school books free.

Mrs. G. M. Banks, with her daughter Herdis, has now returned to her home in Winnipeg, after spending a few days holiday with her sister Mrs. Paul Foist, at the depot.

Miss Adele Irving, a former teacher at Plaxtol school, spent a few days with Mrs. J. Bamela, before leaving for her new school in Edmonton. She was the guest of honor at a little party, when she was the recipient of a farewell token.

Gents 35c Ladies 25c

Misses Beth and Jean Elder, of Saskatoon, have been visiting their cousin Wilma and Carleen Brunner for a week.

Mr. J. Lambeth, of the bank staff, was away from town for the Labor Day holiday.

Attention is called to the advt. re the tax sale of lands in the Gilt Edge M.D., which appears on page four this week.

The girls of the United Church Mission Circle arranged a farewell party for Miss E. Steel at that young lady's home, when a pleasant time was spent by quite a crowd of members.

Representing a reduction of more than 20 per cent, the new parcel express rates took effect over the C.N.R. on Monday.

The first load of new wheat went into the Northern elevator at Greenshields on Wednesday last. Grown on the farm of Ross Valleau, it graded No. 2.

The Atlas Lumber Co. have just finished unloading a car of B.C. fir lumber including flooring and high-grade finish material. Joe Welch.

Owing to a number of cases of infantile paralysis cropping up in Edmonton, the city schools will open for the fall term one week later than scheduled. Public gathering of youngsters has been banned, too.

Mr. M. Haynes is adding to his barn on the farm at Greenshields to provide more accommodation.

A new gravel pit has been opened on the Geo. Clark farm at Fabyan, for the first coating of this end of the new highway.

Mr. and Mrs. Joe Welch motored to the city on Labor Day to visit friends there.

Much work is being done at the Park Cottages Farm these days. Ed Moore is busy drilling a new water well, while the Coffield Bros. are giving the buildings a couple of coats of paint.

Set your own selling price on your second-hand books, and leave them at the Wainwright Pharmacy for sale. Free service.

Mr. and Mrs. H. Clifton have now returned from a holiday spent at Calgary and Banff.

Caused by auto accident, the young Queen Astrid, of Belgium, was killed suddenly on Wednesday last. The funeral took place yesterday. Beside King Leopold she leaves three small children.
